Objet – Subject : Key contribution Myfuel V2 project

Dear Doojesh

On behalf of the entire team of Myfuel V2 project (both Infosys & TFTS) I would like to express our sincere thanks for your efforts in delivering the project.

Myfuel V2 was a challenging project where we did have to perform organizational changes on top of developing and delivering our product. Your contribution to the project was significant.

You have been instrumental to our Core backend development, and the improvement of our delivery methodologies (Dev/QA deployment strategies, complex code merge activities, SonarQube best practices...)

Thank you once again for all your contributions.

Regards

Helene Platel
